

8077 REMOVER

KATS 8077 is a remover for KATS 5080 temporary coating, which is typically used to protect vehicles, machines etc. during transport.

Guidelines for use of KATS 8077:

The coating that is to be removed should remain wet during the removal process; therefore, do not work in direct sunlight during hot weather.

Spray the coated surface with KATS 8077, diluted with 6 parts water. Use a hand-held pump-up sprayer or a De-coater Nozzle, available from KATS. Work from top to bottom.

The coating will become white or gray looking as it absorbs the remover and will slump from the surfaces. **DO NOT ALLOW THE COATING TO DRY DURING THE REMOVAL PROCESS.** In hot, dry, windy weather or where the coated item is large, it may be necessary to have several people working at the same time.

Once the coating is removed, rinse off any residue of KATS 8077. This is particularly important around headlights and taillights, as residue of KATS 8077 will cause cracking of plastic lenses.

Detailed instructions are available from KATS.

BENEFITS:

- Fast acting and user friendly
- Dissolves quickly into water
- Biodegradable
- Non-offensive citrus odor
- Contains no ammonia or phosphates
- Only 0.4 to 0.7 lb/gal VOC's (48 to 84 gm / liter)

APPLICATIONS:

Use KATS 8077 for removal of KATS 5080 temporary coating.

TEST METHOD	DESCRIPTION	TYPICAL CHARACTERISTIC
EPA 1110	Corrosiveness	Pass - Not considered corrosive
GM 9163P	6 Month Removal Test	Pass
GM 3.3.7	Compatibility Test	Pass

The above are average values. Minor variations which do not affect product performance are to be expected in normal manufacturing.

PACKAGING

260 Gallon Totes	55 Gallon Drums	5 Gallon Pails
