Introduction

Petro-Canada SUPREME Motor Oils are premium advanced motor oils designed to lubricate today’s gasoline-fueled passenger cars, vans, SUVs and light duty truck engines. With today’s high-powered engines, SUPREME Motor Oils can provide extended engine life by lubricating critical parts effectively.

SUPREME Motor Oils start with the patented HT purity process which produces 99.9% pure PURITY* base oils. In combination with leading-edge additive technology, they deliver exceptional resistance to thermal breakdown, outstanding low temperature fluidity, and excellent engine protection against wear and deposit formation under the most severe driving conditions.

SUPREME Motor Oils are specially formulated to exceed the latest API Service Classification, SM, for gasoline service. SAE grades 5W-20, 5W-30, and 10W-30 meet the latest ILSAC GF-4 specification.

Features and Benefits

- Extended Engine Life
  - Outstanding protection against wear, rust and corrosion
  - Considerably less wear on rings, liners and camshafts
  - Bearing life greatly extended
  - Minimizes corrosion due to stop-start driving in cold weather

- Protection of Exhaust Emission Control Systems
  - Formulated to meet reduced phosphorus and sulphur levels required to protect and extend the life of exhaust emission control systems

- Exceptional Resistance to High Temperature Thermal Breakdown
  - Cleaner running engines
  - Reduces deposits of varnish, sludge and carbon on engine parts
  - Minimizes piston-ring sticking
  - Minimizes piston deposits in light-duty diesel engines
  - Improves lubrication because oil-ways stay clean

- Outstanding Low Temperature Fluidity
  - Permits easier unaided cold weather starts
  - Reduces wear during low temperature start-up and operation

- Reduced Oil Consumption
  - Low evaporation loss results in less oil top-up

Applications

SUPREME Motor Oils are recommended for year-round use in gasoline, diesel, propane and compressed natural gas (CNG) fueled engines.

SUPREME Motor Oils meets the new car manufacturers’ warranty requirements for North American, European, and Asian vehicles where an ILSAC GF-4 or API SM engine oil is recommended. They are back serviceable where ILSAC GF-3 or API SL engine oils are recommended. They are also suitable for use in light duty diesel applications where API CF is recommended (except 5W-20 grade).

SUPREME 5W-20 Motor Oil is approved against the Ford service fill specification WSS-M2C930-A.

Consult your owner’s manual to select the appropriate viscosity grade for your engine.

Improved Fuel Economy Performance over ILSAC GF-3 Standard

Friction reducers in SUPREME Motor Oils can save between 1.1 to 2.3%* in gasoline consumption compared to a motor oil without friction reducers, and so exceed the API’s latest Energy Conserving ratings. In addition, they retain from 0.8 to 2.0%* fuel economy on the used oil.

This represents a 15% improvement* in the fuel economy requirements compared to the previous ILSAC GF-3 standard.

* For appropriate viscosity grades
